

Richard Glosser's Profile Website

A personal portfolio showcasing my skills and projects as a computer science student specializing in web and app development, highlighting my journey, expertise, and passion for creating innovative digital solutions.

My portfolio is a digital showcase of my skills, projects, and experiences as a computer science student with a focus on web and app development. It highlights my expertise in building intuitive, user-focused applications and demonstrates my passion for creating innovative solutions to real-world problems. Through detailed project breakdowns, technical skill sets, and a glimpse into my journey, it provides a comprehensive view of my growth and aspirations in the tech industry. The site serves as both a professional introduction and a testament to my commitment to mastering modern development tools and technologies.

Personas

1. Computer Science related Employers
2. Colleagues or acquaintances in my field
3. Family or Friends of mine curious about my work

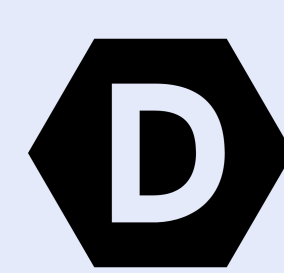

Comps

1. An old hackathon friend of mine Edwin's website (<https://edwinngui.vercel.app/>)
2. A front end designer from Europe, Sharlee shows how much design i can achieve (<https://itsshari.ee/fr>)
3. My favorite band, Three Days Grace, has a website which doubles as a portfolio website but also an advertisement for their music. (<https://threedaysgrace.com/>)

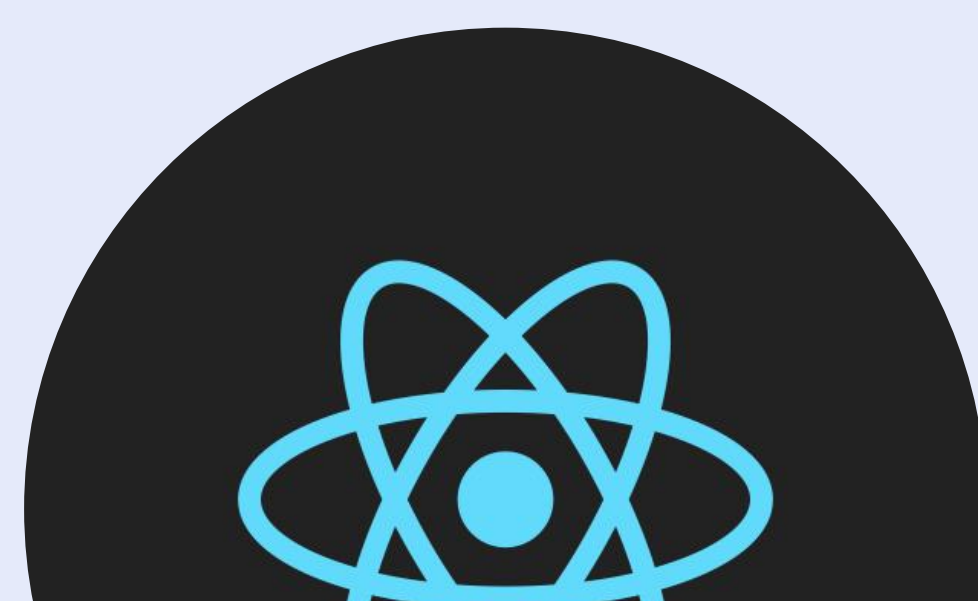

Hi, I am Richard Glosser

Ambitious Computer Science Student @ MSU. I make Apps, Websites, and sometimes Games! Pursuing any opportunity to Hack.

An Avid Web and App Developer

I do what I do because I enjoy creating quality of life experiences and tools for people to use daily.

Add credits for logos are bottom of page, hyper link logos to websites! The goal of the Home page is to be an about me! Focus on concise portrayal of my character and specialties.

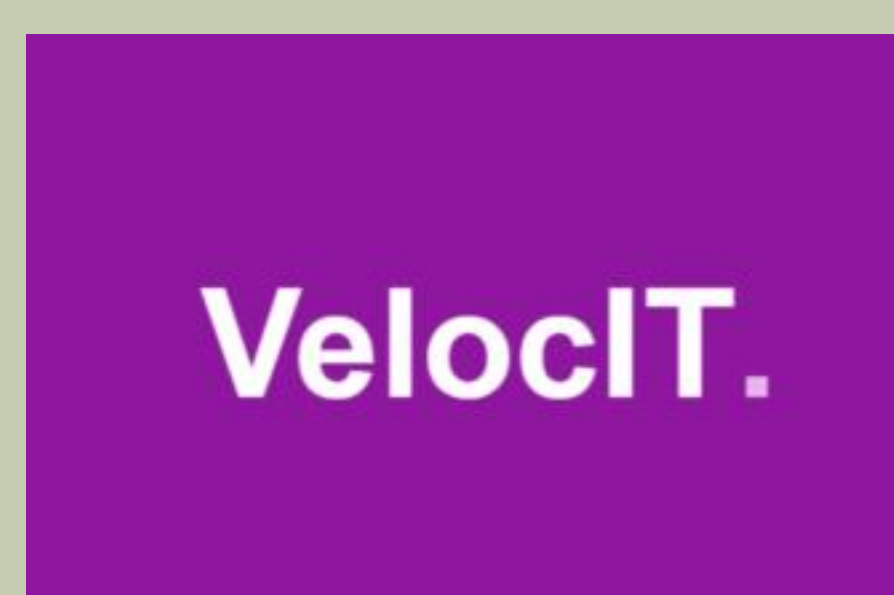

Portfolio

My interests lie in web and app development, where I enjoy designing and building innovative tools that enhance user experiences and streamline workflows.

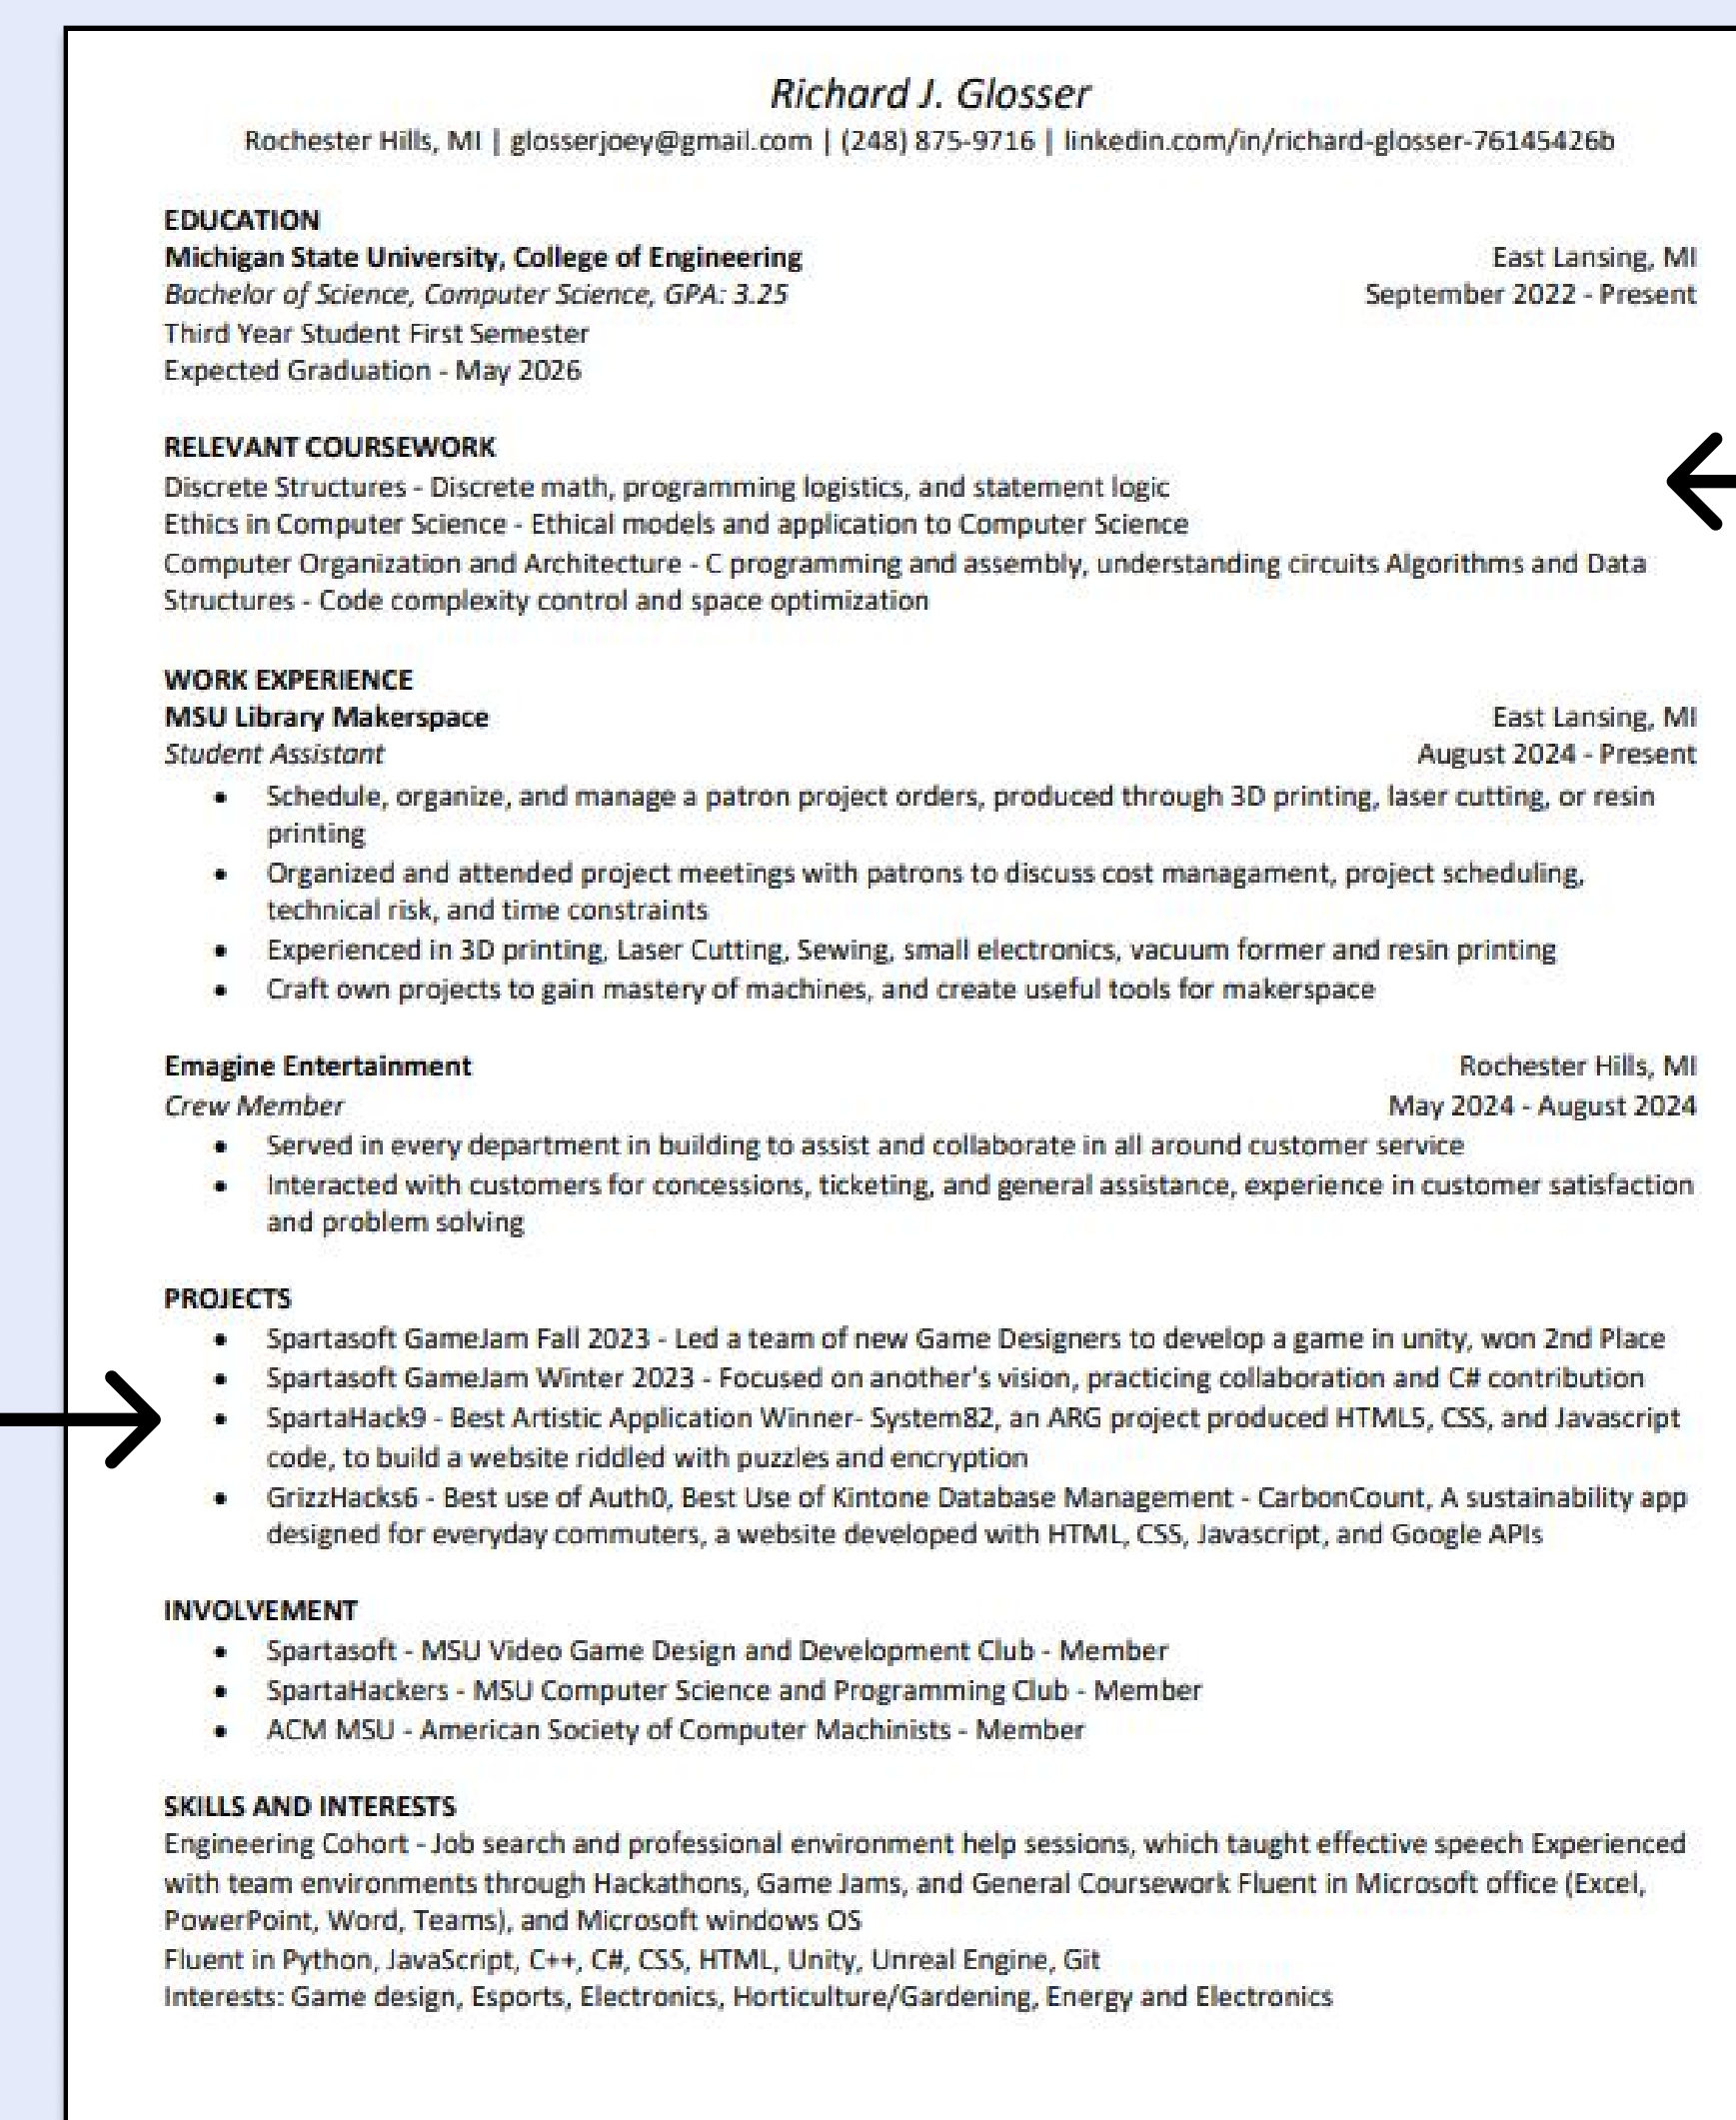

Hackathon 1

Hackathon 2

GameJam

The Resume page is going to be a simple display of my resume, with a download option ideally. There will be on screen blurbs explaining and adding further context to parts of my resume I could not cover in the document itself.

The portfolio page is going to delve deep into my prior project involvement. Specifically what I contributed to the projects, having hyperlinked the images to the github repos for these projects if I can. HIGHLY important that I cover the involvement from both soft skills view and technical skill view.

Notes:

- Keep Consistent nav bar
 - Home page is about page
 - Resume is more education and experience
 - Portfolio has Gamejams and hackathons
- On the portfolio slide include a devpost logo and credit it at bottom of page!
 - Also make sure to add linkedin, github, and other related sites ON HOME PAGE, and project links in portfolio page
